

PowerON

Solutions and Services

The right partner to ensure your
business' IT services are effectively
managed and secure

Smart Teaming

“PowerON’s Smart Managed Service is one of the essential components of our digitisation strategy.”

**Kevin Adams - Transformation Director,
Cats Protection**

Smart Teaming

Workplace and IT requirements are ever-evolving, meaning organisations can struggle to manage, patch, and ensure environments are secure.

We help organisations simplify IT operations, free up resources and reduce costs with our range of managed services.

Smart Teaming is our modern managed service designed to work collaboratively with IT teams to manage, patch and secure client devices, servers and mobiles.

Managed services reduce risk, cut costs and allow your team to get on with more important, higher value projects - safe in the knowledge that your IT estate is being taken care of behind the scenes.

- Reduce IT device management and deployment challenges
- Minimise device management tooling downtime and improve IT efficiency
- Free up IT team to focus on high-value, mission-critical support and projects
- Transform your IT services team from a triage operation into a strategic development function
- Ensure strategically aligned IT delivery
- Improve end user experience and engagement
- Maximise ROI from existing Microsoft license investments

Smart Teaming

Our team of experts specialise in developing secure, robust solutions tailored to your needs.

Unlike other service contract structures, whose model is to replace existing teams, PowerON integrates with IT teams to provide a bespoke service that frees up your IT team to work on high value, long-term projects.

Through our Smart Teaming Managed Service, we work alongside your team to support the wider business strategy.

Automated management of mobile devices

- Supports coverage across Corporate and BYOD scenarios
- Manages mobile device enrollment and control
- Easy Application Profiling and Deployment
- Ensures devices are compliant with your policies
- Delivers Patching Management across your mobile estate
- Maintains compliance with Cyber Essentials

Estate-wide desktop lifecycle management

- Designed to integrate with your team
- Delivers Windows as a Service
- Maintains compliance through patching and updates
- Supports direct to End User provisioning
- Devices managed, anywhere
- Maintains compliance with Cyber Essentials

Secure server patching in a controlled and methodical process

- Windows Patching across physical and virtual environments
- Reduces Operating System and application security vulnerabilities
- Removes the burden of patching from your IT Team
- Cloud-based delivery
- Transparent Service Reporting
- Maintains compliance with Cyber Essentials
